Context

The situation of companies in Spain

You overpay on contributions nobody has reviewed in years

Social Security contributions are decided in three places nobody reviews together: the **AT/EP rate** (occupational accidents and diseases) of each job, the **sick leave** (IT, *incapacidad temporal*) benefit the company advances as a delegated payment, and the **HR grants** it is entitled to.

Each one drifts on its own. An inherited rate is overpaid every month, a delegated payment that is not offset stays at the company's expense, and a grant that is not applied **is lost after three months**.

At Ayming we believe a company should neither fear an inspection report nor pay more than it owes. We review all three levers on the same payroll data, and correct deviations in both directions.

3 months to claim an unapplied grant

4 years of reviewable contributions

Why social contributions need continuous monitoring

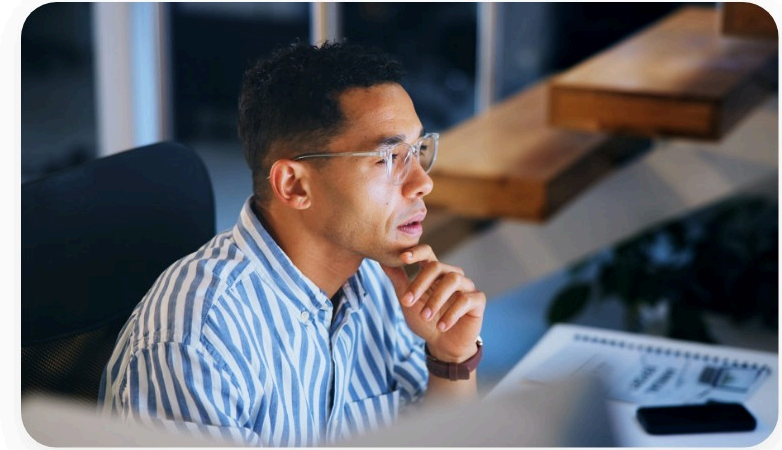

Occupational Accident contribution rates control & optimization

Same job, two rates. Acquisitions, transfers and the move to CNAE-2025 leave occupation codes that no longer match the actual job, and the AT/EP rate follows the wrong code. A company that did not report its CNAE-2025 code is automatically charged the highest rate in its family.

Social Security Benefit payments vs reimbursements control

Advances that never come back. Sick leave (IT) is advanced as a delegated payment. The company pays the benefit and offsets it against its monthly contributions. One error in the cause of leave, the dates or the reference salary, and part of what was paid is never offset. Nobody compares the two figures.

HR Grants

We help you claim every HR grant you are entitled to.

Hiring grants for specific groups (people with disabilities, certain age groups, low-skilled workers, the long-term unemployed, people at risk of social exclusion) are numerous but complex to apply. Any grant not claimed within three months is lost.

40

YEARS OF EXPERIENCE

65M€

BILLED IN SOCIAL CONTRIBUTIONS

For industrial groups that want to comply with the rules and pay the right amount of social contributions, Ayming International HR reviews the AT/EP classification, recovers sick-leave delegated payments that were never offset, activates the HR grants not yet applied and corrects the system settings, on a success fee basis.

Three areas of study

Three different mechanisms, one data set.

AREA 1 AT/EP contribution rates

The goal: declare the correct classification and contribute the right amount, correcting deviations both upward and downward.

Compliance. The rate depends on the company's activity (CNAE) and on each employee's actual occupation, and the actual occupation prevails.

Savings. An occupation classified above its real risk overpays. Correcting it lowers the rate and allows what was paid to be recovered.

1.50% ← 3.85% → 6.70%

Office work only (code a)

Rate of the company's activity

Installation and repairs (code d)

Each employee's actual occupation corrects the rate in both directions.

AREA 2 Sick leave (IT) delegated payments

The company **advances the benefit** and recovers it by deducting it from its monthly contributions. The list shows, by length of leave, what the company recovers and what it bears itself.

NON-WORK-RELATED ILLNESS • DAYS OF LEAVE

1 to 3 No benefit

4 to 15 60%, company cost

16 to 20 60%, INSS/Mutua cost

From day 21 75%, INSS/Mutua cost

WORK ACCIDENT AND OCCUPATIONAL DISEASE • DAYS OF LEAVE

Day 1 Full salary

From day 2 75%, INSS/Mutua cost, no waiting period

The percentage is the sick-leave benefit applied to the reference salary. When the INSS or the Mutua bears the cost, it is advanced as a delegated payment and offset against the monthly contributions.

AREA 3 HR grants and contribution reductions

The goal: apply every grant the company is entitled to and secure the ones it already applies against any inspection.

Savings. Each unapplied grant (disability, retirement age, sick leave of workers aged 62 and over, contract conversions) is activated from the next settlement, and past amounts are claimed as far back as the legal deadline allows.

Compliance. Each grant can be reviewed for four years. Requirements, exclusions and job-retention obligations are checked so that none ends in a repayment with surcharge and interest.

€525

per month at most
per person with a
disability

3 months

to claim an
unapplied grant

4 years

of review of the
grants applied

What is not applied in time is lost, what is applied gets reviewed.

AREA 1

AT/EP contribution rates

Activity mapping

Analyse your practices and identify the activities actually carried out at each site.

Occupation mapping

Identify the Cuadro II occupations that can carry a specific AT/EP rate, different from the one derived from the CNAE.

Impact quantification

Compare the rate actually applied with the one that should have applied, and quantify historical overpayments and future savings.

Claim and correction

Prepare the refund and correction claims with the Social Security General Treasury (TGSS), with supporting documentation.

Follow-up of claims

Follow administrative or court decisions through to their actual enforcement, coordinating with the competent bodies. If a dispute arises, an independent law firm chosen by mutual agreement takes over.

AREA 2

Sick leave (IT) delegated payments

Scope identification

Identify every sick-leave case in the period not yet time-barred, generally up to the last 4 years.

Benefit classification

Classify each case by cause of leave (illness or accident) and determine the delegated payment period and the amount involved.

Reconciliation and quantification

Compare the amounts the company advanced as delegated payments with those actually offset against its contributions.

Recovery of amounts

File the reimbursement claims with the competent body, with supporting documentation and follow-up until a decision is issued.

Collection

Collect the reimbursements once decided, coordinating with the competent bodies. If a dispute arises, an independent law firm chosen by mutual agreement takes over.

AREA 3

HR grants and contribution reductions

Workforce inventory

Cross-check contracts, registrations and affiliation data against the current catalogue of grants and reductions.

Entitlement detection

Identify the employees who qualify for a grant but are not declared in the RED payroll filing system.

Requirements check

Check exclusions, job retention and employer obligations before applying or keeping each grant.

Regularisation and recovery

Report the data changes for the next settlements and claim reimbursement of what was not applied within the legal deadline.

Follow-up under inspection

Keep the documentary file up to date and support the company through information requests from SEPE, TGSS or the Labour Inspectorate.

Documents required

What we need to start each area of the study.

GENERAL

- List of entities, work sites and contribution account codes (CCC, códigos cuenta de cotización), with current and historical CNAE, and of the mergers, acquisitions and reorganisations that affected the scope analysed
- Historical employee master file: ID, entity/CCC, site, job, dates of hire/exit/job change and occupation code applied
- Payroll extract for the last 4 years (Excel/CSV format)
- Contribution settlement receipt (RLC, Recibo de Liquidación de Cotizaciones) for each settlement period
- Calculation and contribution base files from the direct settlement system (SLD, Sistema de Liquidación Directa), if available

AT/EP RATES

- Job descriptions, with their occupational risk assessments
- Documentation of the activity carried out at each site: activity licences, activity descriptions, occupational risk prevention (PRL) documentation, any document that shows the functional and operational separation of the activities

SICK LEAVE DELEGATED PAYMENTS

- Association agreements with Mutuas and coverage history by CCC, stating the risks covered
- INSS company file (Fichero INSS Empresas, FIE/FIER), if available
- Detail of the benefits advanced as delegated payments: worker, cause of leave, dates, reference salary and amount paid

HR GRANTS

- Employment contracts and their conversions, with the contract code reported
- Contribution data report (IDC, Informe de Datos para la Cotización) for each worker, with the grants and reductions applied
- Disability certificates provided by workers, where they exist
- Information requests or letters from SEPE, TGSS or the Labour Inspectorate about grants applied

About Ayming

Our references and international presence

A global answer, delivered locally

Ayming International HR centralises the social contributions practice so the best specialists can be mobilised on every assignment, and delivers the service in country.

1

One centre of excellence, not scattered offices

We concentrate the social contributions practice in a single team of 95 specialist consultants instead of spreading it across country headcounts. Capacity is assigned by specialism, not by geography.

2

Ayming International HR mobilises on your case

Ayming International HR puts the best specialists in each mechanism on every assignment, with data analysts, a single methodology and strategic account management, backed by quality and R&D.

3

The assignment is delivered in Spain

The assignment runs in country, in Spanish, with a local presence, an independent Spanish law firm chosen by mutual agreement, and direct dealings with the authorities.

A local advisory firm is limited to its own headcount. You get the full bench of the group.

Our strategy at work, three examples

This offer is not the only one built this way. Three examples from the group, in managed services, software and consulting.

MANAGED SERVICES

Accident reporting in 28+ countries

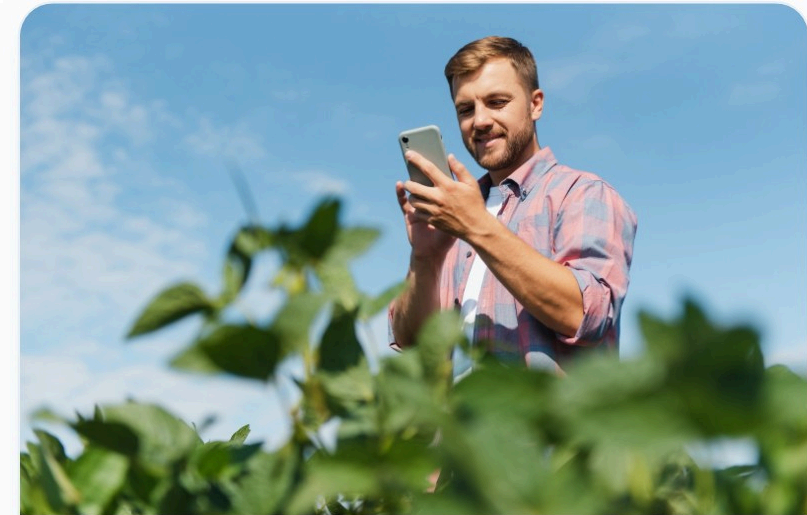

Ayming International files through the local forms and systems of each country: Net-entreprises in France, Sistema Delt@ and CoNTA in Spain, the INAIL report in Italy.

SOFTWARE

HSE audits and inspections

One audit module applied country by country, aligned with the international standards ISO 45001 and ISO 14001.

CONSULTING

Sustainability and environment

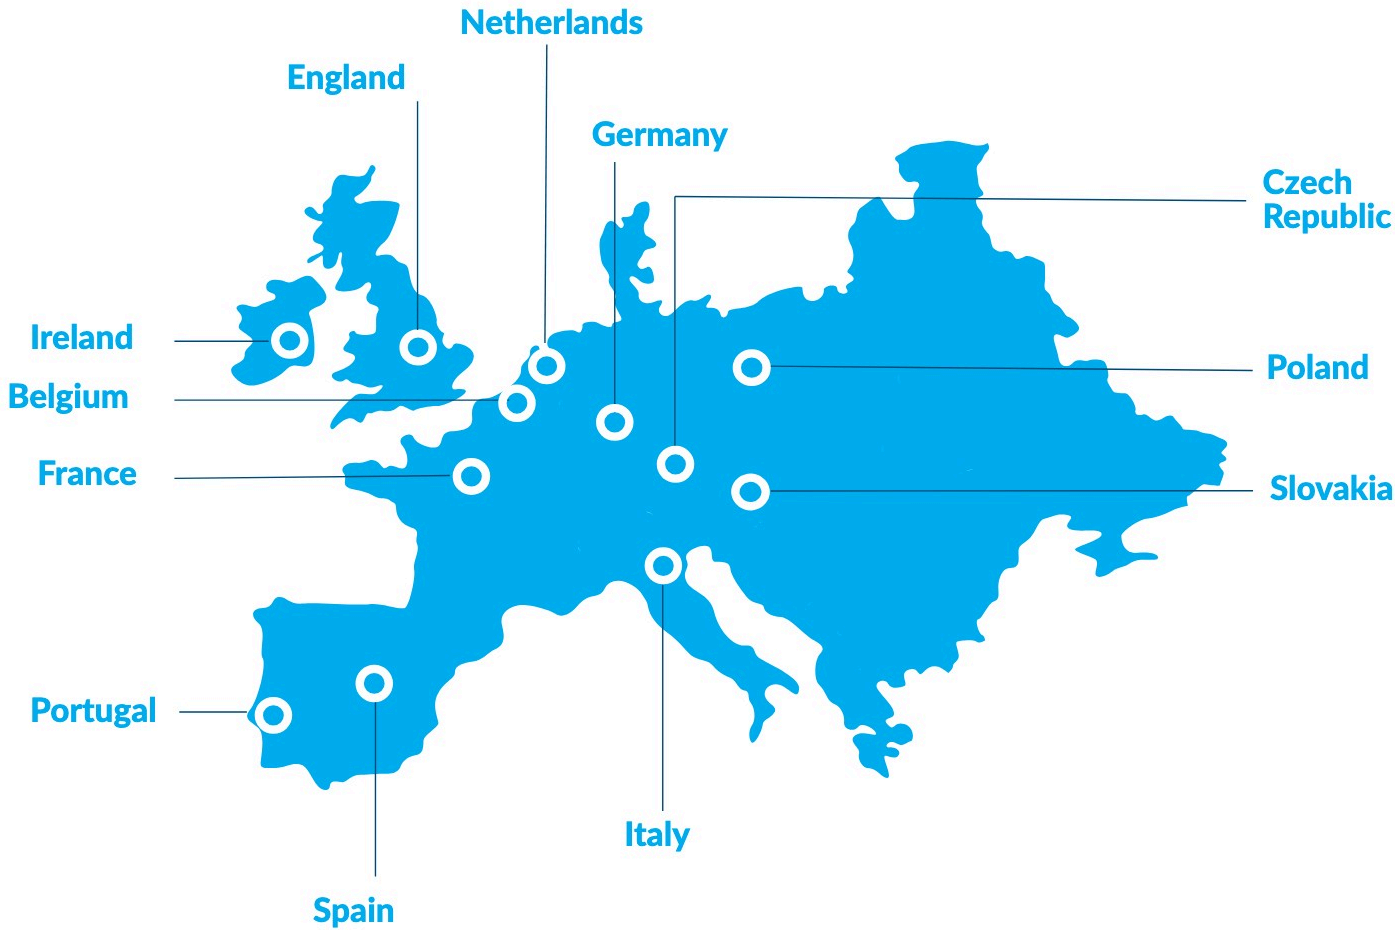

An international view with a local focus: environmental taxes, energy saving certificates, grants and ESG reporting compliant with CSRD.

Local presence and hands-on experience of the Spanish system...

Our teams support our clients day to day, drawing on an **ecosystem of professionals** across the country: independent law firms specialising in social security, graduados sociales (labour relations advisers), chartered accountants and independent doctors, present in Madrid, Barcelona and Valencia.

... with the strength of the whole Ayming International HR team, Europe's leader in social contributions

Social contributions expertise

An ideal solution

Full review of the three levers: CNAE classification and occupations, sick-leave delegated payments and HR grants, based on historical data and operational reality.

Activation of the HR grants and reductions the company is entitled to, and verification of those already applied.

A team of experts, fully dedicated and ready to mobilise immediately.

Declaring the CNAE-2025 code and the occupations, so you no longer pay the highest rate by default.

Quantification of the recoverable amounts and full handling before the authorities, through to actual reimbursement and correction of the system settings.

Clear governance: periodic reporting, traceable positions, transparency on risks and digital tools for exchanging information.

Thank you.
